

SIA

S A Y I T A L O U D

The Career Activation Programme

Your resume gets you in the room. SIA gets you the offer.

The SIA Philosophy

Your resume says you're qualified. Your LinkedIn says you're connected. But when you walk into that room — can you Say It Aloud?

That's where placement is won or lost. SIA exists to close that gap.

Programme Objective

To transition students and professionals from “candidates” to “preferred hires” — through evidence-based training, ATS optimisation, and high-stakes communication mastery.

PHASE I The Foundation

Focus: Personal Branding & ATS Compatibility

Module 1: The Anatomy of a High-Impact Resume

- Understanding ATS: Why formatting, keywords, and layout can make or break your application before a human ever sees it.
- Resume Formats Decoded:
 - Chronological vs. Functional vs. Hybrid — and when to use each.
- The Action-Result Framework:
 - Shifting from task-based descriptions to achievement-based bullet points that recruiters remember.

Module 2: Professional Digital Footprint

- LinkedIn Optimisation: Aligning your profile with industry standards and recruiter search behaviour.
- Professional Email Etiquette: Crafting cold outreach to recruiters and effective follow-up communication.
- Cover Letters that Sell: The Value-Proposition approach — making every word count.

PHASE II The Gatekeeper

Focus: Navigating the Technical & Behavioural Filters

Did you know? 70% of candidates are eliminated before a human ever reads their resume. SIA trainees learn how to beat the system.

Module 3: Aptitude & Cognitive Preparedness

- Demystifying the Assessment Landscape: Quantitative, Logical, and Verbal Reasoning — decoded.
- Time-Management Strategies for competitive assessments: how to score more in less time.

Module 4: Group Discussion (GD) Mastery

- GD Frameworks: How to initiate, sustain, and conclude a debate with authority.
- The Art of Assertive Communication: Balancing active listening with visible leadership presence.

★ SIA Diagnostic — Mock GD Session

Exclusive, limited-seat mock Group Discussion with personalised performance feedback. This is the SIA experience — before you commit, try it.

PHASE III The Final Frontier

Focus: Behavioural Psychology & High-Stakes Performance

Module 5: Behavioural & Technical Interview Mastery

- The STAR Method: Structuring your stories to answer behavioural questions with clarity and confidence.
- Body Language & “Hold-the-Room” Presence: Managing non-verbal cues and performance anxiety.
- AI-Assisted Preparation: Using AI tools to simulate interview scenarios and sharpen your responses.

Module 6: The Executive Closing

- Negotiation 101: Professional etiquette for salary discussions and role negotiation — how to leave the table with the best offer.

★ SIA Diagnostic — 1-on-1 Mock Interview

Exclusive, limited-seat individual mock interview with a detailed professional feedback rubric. Walk in as a candidate. Walk out knowing exactly what it takes to get hired.

Programme Delivery Model

Segment	Duration	Mode	Objective
Core Workshops	As requested	Group / Batch	Knowledge Transfer & Skill Building
SIA Diagnostic Sessions	10–15 Participants	Individual / Small Group	Experience the SIA difference — the conversion trigger
AI Integration Labs	Throughout programme	Hybrid (Online + Offline)	Equipping candidates with next-generation tools
